

## Step Testing

---

### Pre-requisite:

1. XAMPP for mysql
2. GO
3. POSTMAN / Terminal (for CURL) / Swagger UI

### Step :

1. Open XAMPP
2. Start XAMPP Apache and MYSQL (make sure the server is on)
3. Open <http://localhost/phpmyadmin>
4. Create a new database call **crud\_karyawan**
5. Please download and extract CRUD\_KARYAWAN\_RIKO\_TEST.zip
6. Open CMD/Terminal, located to path that file CRUD\_KARYAWAN\_RIKO\_TEST.zip was extracted
7. Type "go run main.go"  
(maybe will prompt acces local network, Please choose allow access)
8. Please import  
*CRUD\_KARYAWAN.postman\_collection.json* to POSTMAN or copy file  
*CRUD\_KARYAWAN.postman\_collection.json-SwaggerYaml.yaml* and paste in SWAGGER UI
9. Try hit API
